

Online Demo Test

The Demo Test is an **abbreviated, unscored** version of the online test, designed to allow testers and test managers to experience the test format and interface before the actual exam.

The Demo Test

- contains **10 questions** per section
- has the same difficulty level as the **CLT3**
- does not provide a score or answer key

Testers should use the Demo Test as a way to become familiar with the online test experience and practice entering their tester profile information, selecting answers, and moving between questions and sections.

To access the Demo Test, go to test.cltxam.com and enter the access code **DemoTest**.
